Pilot scope summary

Matakupan Labs · matakupanlabs.com

Thank you for ordering the pilot. This summary explains what you receive, what we need from you, and how the data is delivered.

Other packages: **Full package** 25,000 rows, 14 business days, 2 revisions. **Monthly refresh** 5,000 rows per month, minimum 3 months.

1. Pilot scope

ITEM	DETAIL
Source	1 public site, 1 page type
Rows	5,000 rows
Region	1 province or city
Time	7 business days after a complete intake
Format	CSV, Excel (XLSX), or JSON
Revision	1 revision for wrong columns or rows
Price	USD 49, invoiced by PayPal or bank transfer in USD; transfer fees are yours unless you pay by PayPal

2. What we need from you

1. **One source URL.** A public page that lists the data, not a login page.
2. **Column list.** For example: title, price, location, date, URL.
3. **Region.** One province or city. Leave empty if the data is national.
4. **Output format.** CSV, XLSX, or JSON.
5. **Notes.** Filters, an example row, or anything to avoid.

Intake form: the link is emailed after payment. Complete it within 7 days. If the link expires, reply to the invoice email and we will resend it.

3. Workflow

1. You approve the scope and pay the invoice by PayPal or bank transfer in USD.
2. You receive an email with the invoice and the intake form.
3. You complete the intake.
4. We check the source and confirm within 1 business day.
5. We collect, clean, and deliver the file within 7 business days after intake.
6. You review. One revision is included within scope.

4. Limits and ethics

- Public data only. No login pages, no personal data, no captcha bypass.
- One source and one schema. Multi-source work belongs to the full package or a separate project.
- If a source blocks access or changes so the data cannot be collected, we offer a replacement source or a full refund.
- Pilot output is for the buyer. It may be used inside client deliverables, but not resold as a raw data product.

5. Contact
